About

Experienced FullStack JavaScript developer with 14+ years of industry experience, including a lifelong passion for computers and coding since a young age. Demonstrates expertise in code quality, performance optimization, and continuous integration. Quick learner with the ability to adapt to new languages and environments seamlessly, thanks to a comprehensive understanding of various programming languages and operating systems.

Work

Nov 2024 – Present

TAXFIX - Senior Software Engineer

Senior Software Engineer at Taxfix, focused on full-stack development, mainly Node.js, Golang, React.js and Next.js with TypeScript, using GCP infra. Starting to navigate into the world of LLMs to enhance our developments and our tools.

Highlights

- 2025-09 - present # Started automating development using n8n and coding agents, from Jira to Draft PRs.
- 2025-09 - present # Started exploring MCP and its potential providing context during development and also enhancing our tools.
- 2025-05 # Initiated the use of well curated prompts in VSCode and Cursor to generate tests automatically for our codebase to increase the coverage easily
- 2024-11 - present # Development of internal applications to handle taxes submissions in React.js and Next.js, with Golang and Node.js for the endpoints, using MySQL and MongoDB and GCP infra
- 2024-11 - present # Research new features using VertexAI, Gemini API, and LLMs.

2024-11 - 2025-05 # I've driven, developed and released the first company's AI feature to production to reduce the handling time of our users by several minutes. It involved testing different models (gemini's, openai's, other opensource ones like llama 8b or 70b) and infrastructures, checking accuracies, latencies, prices... Also checking different libraries for Python and Golang, developing a feedback system to constantly improve the prompt, setting dashboards in snowflake to monitor the usage, adoption, ratings...

Dec 2022 – Nov 2024

TAXFIX - Software Engineer

Software Engineer at Taxfix, focused on full-stack development, mainly Node.js, Golang, React.js and Next.js with TypeScript, using GCP infra.

Highlights

- 2022-12 - 2024-11 # Development of internal applications to handle taxes submissions in React.js and Next.js, with Golang and Node.js for the endpoints.

Dec 2012 – Oct 2022

SERQUO - Programmer Analyst

Software Developer at Telefónica Tech (previously at I+D). I've worked mainly focused in full-stack javascript, continuous integration and applying best practices, most of the time at video area developing the UI of Movistar TV set-top-boxes for LATAM, now at Cloud area developing CloudBlue APS/Connect for our CSB, both connectors and endpoints.

Highlights

- 2022-01 - 2022-10 # Telefónica - Devi: Integrations with CloudBlue, endpoint development in Node.js; development of Connect products and endpoints in Node.js. Development of Jenkins CI/CD pipelines.

- 2019-03 - 2022-10 # Telefonica - MultiCloud: Development of Connect applications (previously APS 2.2) for CloudBlue, integrating external cloud services (AWS, Azure, GCP...). Backend in AWS lambdas using Python/Node.js.
- 2019-01 - 2019-03 # Bankia: A simple Angular 1.x application to check fraudulent usage in ATMs
- 2017-01 - 2019-01 # Movistar TV - Hybrid HTML: The same but using HTML instead of SVG, and Webpack instead of Grunt.js. In 2017 we made it in Vue.js, in 2018 we removed it and did everything with Webcomponents.
- 2015-01 - 2019-01 # Movistar TV - Hybrid SVG: Development of the UI of a set-top box (STB) with satellite/cable and internet connection for TVApps and VOD, using SVG and JavaScript to communicate with the middleware. Also I've installed and configured all the continuous integration environment with Jenkins and Sonar, and made the Grunt.js tasks to automate everything, from linting or testing to opening pull requests automagically integrating Crowdin with new translations from the OBs.
- 2015-02 - 2015-03 # Movistar TV - GO: Movistar TV web application, which allows to watch Live TV and VOD content, and handle your subscriptions, view the EPG and more. Joined the team for one month to speed development of new features.

- 2015-01 - 2019-01 # Movistar TV - Chromecast Receiver: Chromecast Receiver for the mobile applications of Movistar TV, which handles to play Live TV and VOD on Chromecast. Developed in Angular JS. Also installed and configured all the continuous integration environment with Jenkins and Sonar, and made the Grunt.js tasks to automate everything, from linting or testing to opening pull requests automagically integrating Crowdin with new translations from the OBs.
- 2014-01 - 2014-11 # Telefonica - Cloud Service Broker: CSB is a panel to manage users, assign resources or services, handle your account as a user... It uses Parallels (POA and PBA). Development of an APS 1.2 to integrate McAfee Multi Access in CSB, front-end (in Dojo Toolkit) and back-end (in Node.js), for O2 (UK and GER) and VIVO (Brazil). Also made all the ci environment.
- 2013-07 - 2014-02 # Telefonica - Feedapp: Web application made with the magic of Meteor.js and Lungo.js, connected to our internal LDAP server to handle logins. After finishing it, we ported all the Lungo.js part to Firefox building blocks as some of the members of the team were members of Firefox OS and wanted to use it in their devices. This app allows to send feedback to people personally or anonymously about projects, behavior...
- 2012-12 - 2013-12 # Movistar TV - Hybrid: Development of the UI of a set-top box (STB) with satellite/cable and internet connection for TVApps and VOD, using SVG and JavaScript to communicate with the middleware. Also I've installed and configured all the continuous integration environment with Jenkins and Sonar, and made the Grunt.js tasks to automate everything, from linting or testing to opening pull requests automagically integrating Crowdin with new translations from the OBs.

Jan 2012 – Dec 2012

CIBER - Systems Integration Consultant

Programmer at System Integration, I've been developing a social network, Android apps, rest services at BBVA GAE project, sites with Google Sites for internal

documentation at BBVA and Telepizza's mobile app.

Highlights

- 2012-09 - 2012-12 # Telepizza - Mobile app development: Development of the Smartphone/Tablet application, with our own javascript framework to load all sections dynamically in a single page application.
- 2012-06 - 2012-09 # BBVA - Google App Engine (GAE) Team: Development of services and apps for BBVA using Google App Engine (GAE). After the development of several REST services, I created some documentation webs for internal projects using Google Sites and developing gadgets in Google Apps Script.
- 2012-02 - 2012-02 # HEEL - Android application: Development of a tablet application (Android) for a pharmaceutical laboratory. This app is used to let pharmacists to fill and sign contracts of sale and purchase, with a pharmacy database. It captures the form as a digital image and stores the filled form in CVS format to post-process it.
- 2011-06 - 2012-06 # TUYYOU - Development of a Social Network: Continuing the development.

Jun 2011 – Jan 2012

CIBER - Junior Systems Integration Consultant

Junior Programmer at System Integration developing a social network.

Highlights

- 2011-06 - 2012-06 # TUYYOU - Development of a Social Network: Social network development using ELGG and modifying it's core. It pretended to join a buying platform with a professional network, offering the possibility to earn money from your referrals. It was running for several years, being announced in several media around the country.

Volunteer

Game development in JavaScript — Mar 2012 – Mar 2012

Speaker

It was a conference @etnassoft and I did about Game Development in JavaScript. It was in CAMON, with around 90 attendees.

Highlights

- Video: https://vimeo.com/39259983
- Slides: http://www.serginator.com/juegos-en-js/#/home
- Info about the session: http://lanyrd.com/2012/madridjs/sdqxgc/

Game programming in JavaScript — Dec 2013 – Dec 2013

Speaker

Advanced workshop on how to develop a game without libraries, plain JavaScript, for the GameMe5 event. In this workshop we showed and explained in four hours, step by step, a shootem up demo.

Highlights

- Repo with more info and code: https://github.com/serginator/workshopGameMe5
- The game can be played here: http://serginator.github.io/workshopGameMe5

MadridJS Meetup — Aug 2011 – Dec 2015

Co-Organizer and member

Co-Organizer of MadridJS, helping with talks and organization but with the lack of time, just member since 2015

HTML5 Spain Meetup — Feb 2012 – Dec 2015

Member

JavaScript study group — Aug 2011 – Sep 2011

Member

Study group formed by several members of the JavaScript community in Madrid to learn and debate about JavaScript ecosystem.
